Explanation of Seller's Internet Display Options:

1. Allow Internet Display

If "no" is selected, your listing will be marked for no display in NTRDIS MLS data feeds to internet websites that display property listing data, whether intended for advertising the property (IDX sites, Realtor.com, NTRDIS Translator, etc.) or for providing online brokerage services (Virtual Office Websites "VOW"). *Please note that brokers do not have the option to opt-out of VOW but are able to make selections based on their preferences for IDX, Realtor.com and NTRDIS Translator. This is done in NTRDIS Listings by clicking on My Tools>My Page>Office Participation.)*

2. Allow Address Display

If "no" is selected, the address (street number and name) of your property will be hidden on websites receiving data feeds from NTRDIS MLS that result in internet listing display, whether intended for advertising the property as noted in #1 or for providing online brokerage services (VOW).

3. Allow Public Comments/Reviews

Some websites that display MLS listing data may provide functionality that permits consumers to enter comments or reviews of the listing properties. If "no" is selected, the website may not collect or display comments or reviews of the listing or by hyperlink to such comments or reviews. Please note that the broker displaying the listing on his/her VOW may add commentary representing his/her professional judgment regarding the listing's value, etc.

4. Allow AVM

Some websites that display MLS listing data may provide an automated valuation model (AVM) function or service. An AVM uses statistical calculations to estimate the value of a listed property based on data from available public records, the MLS, and other sources and incorporating certain assumptions. The seller(s), by selecting "no," may prohibit display of an AVM of his/her listing adjacent to the listing display.
