

## Internet Explorer 7 Tips for MLS Users

*Are you missing the Menu Bar (File Edit View) you had in IE6?*

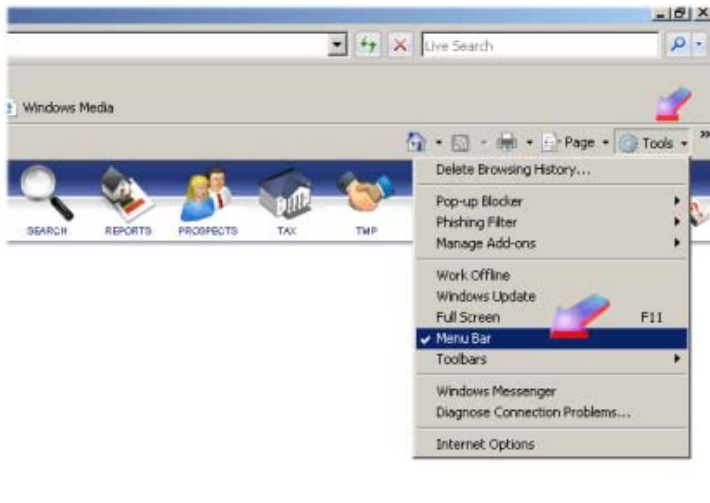

You can add the Menu Bar “on the fly” in IE7 by hitting the “Alt” key on your keyboard one time. The Menu Bar with File Edit and View appears. If it disappears click Alt key again.

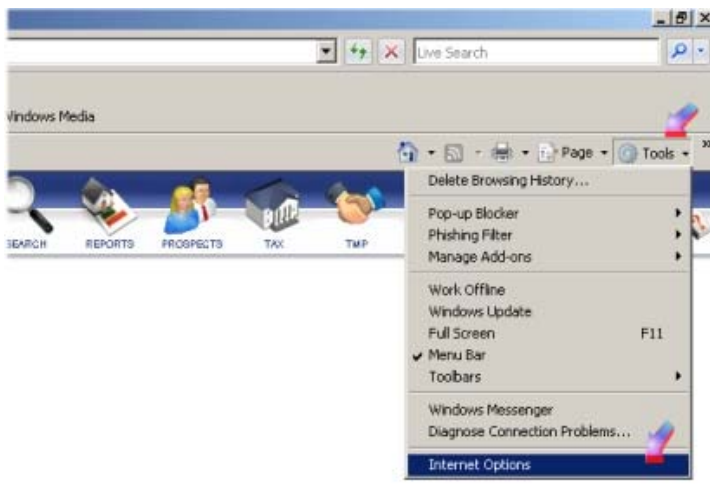

***How do I keep the Menu Bar available at all times?***

On the right side of IE click on Tools and put a check beside “Menu Bar”.

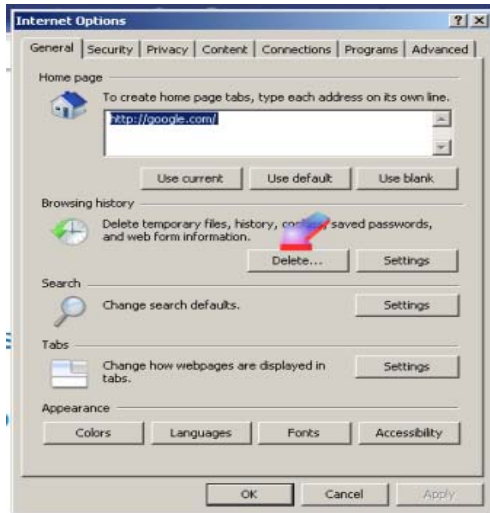

***How do I empty Temporary Internet Files and Cookies in IE7?***

Click on Tools and choose Internet Options.

Under Browsing History click “Delete”

Under Temporary Internet Files, click on “Delete”

Then click Yes to confirm

Next, click Delete Cookies

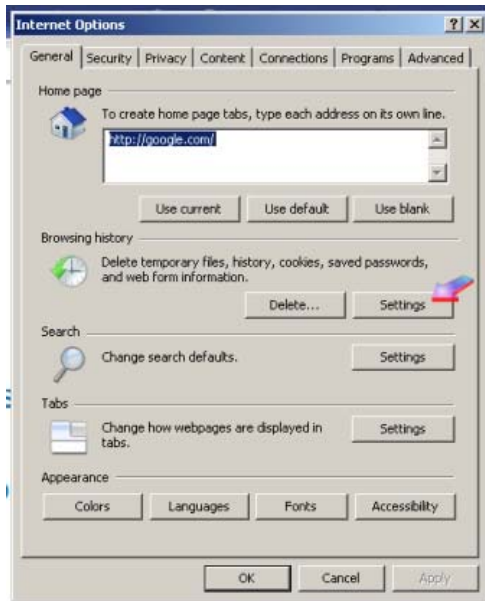

Then click Yes to confirm then click on close.

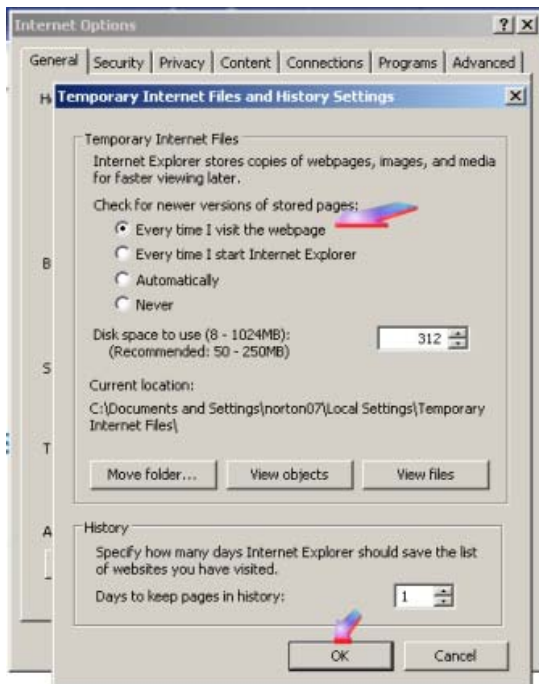

***To insure best performance while working in NTREIS Listings/Tempo, make sure these settings are set correctly.***

Under Browsing history, click on Settings

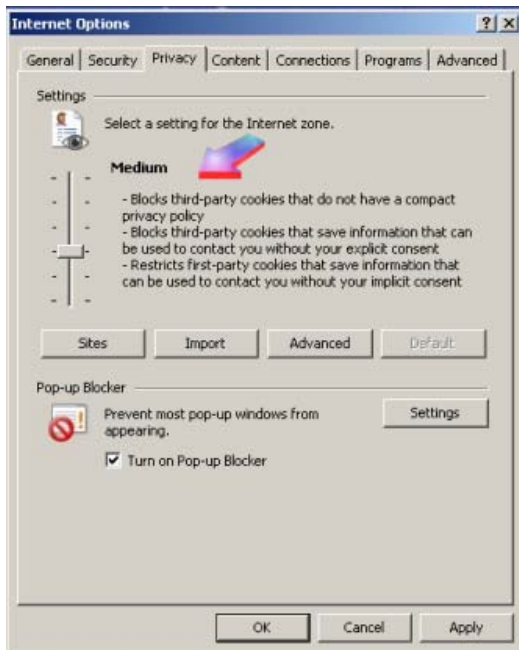

Where it says “Check for Newer Versions of Stored Pages,” place the dot on “Every Visit to the Page”. Then click Ok.

Next go to the Security Tab and make sure it is set on Medium-high. If it is set higher, click the Default level button.

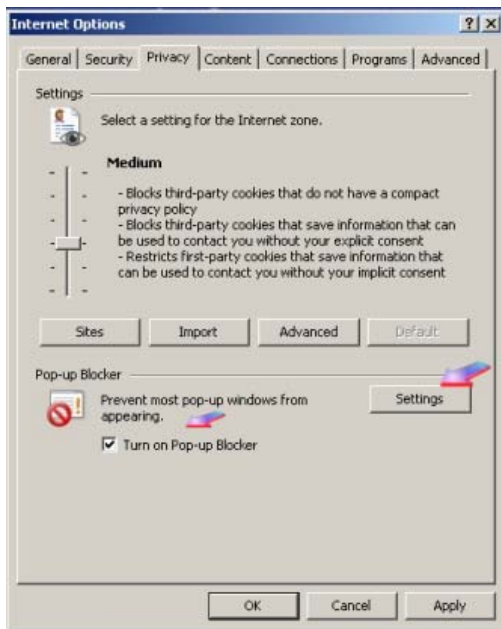

Next go the Privacy Tab and make sure it is set on Medium. If it is set higher, click the Default button.

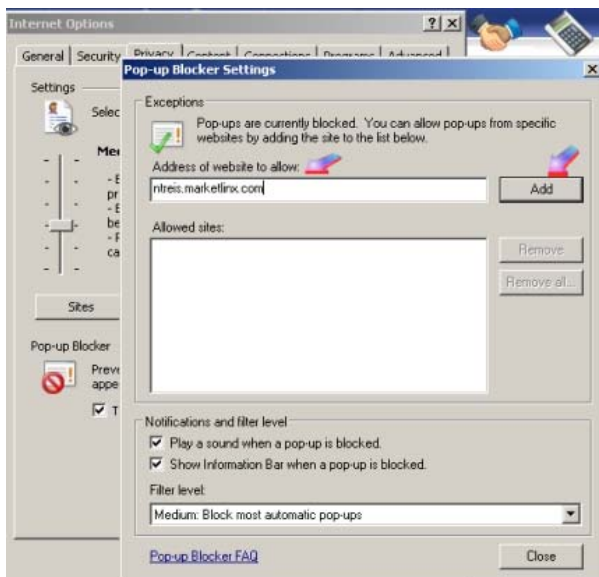

If the Pop-up Blocker is checked, do the following to allow Reports and other functions in MLS to work properly:

Click on Settings

If the MLS site is listed under “Allowed sites”, do nothing and click close. If the MLS site is not listed, enter the address (such as ntreis.marketlinx.com) in the “Address of website to allow” box and click Add. When done, click Close. Then click Ok to close Internet Options.
